

WHO NEEDS USERS IN THIS BRAVE CLOUD NATIVE WORLD?

What's pizza got to do with anything?

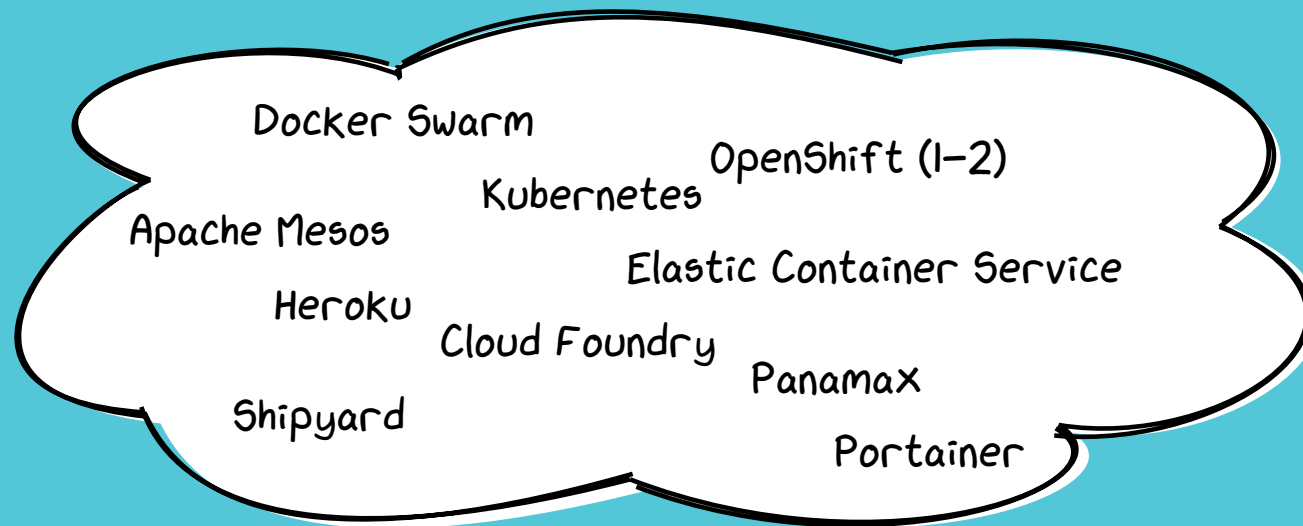

END USERS BEWARE

Kubernetes is for people building platforms. If you are a developer building your own platform (AppEngine, Cloud Foundry, Heroku clone), then Kubernetes is for you.

ALL HAPPY FAMILIES

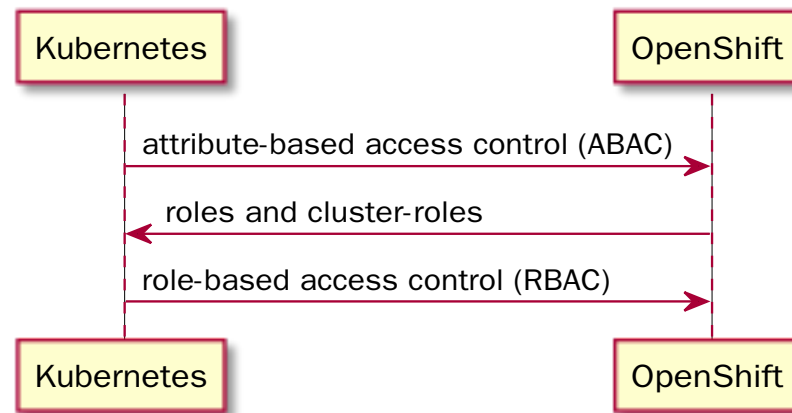

SPLENDID ISOLATION

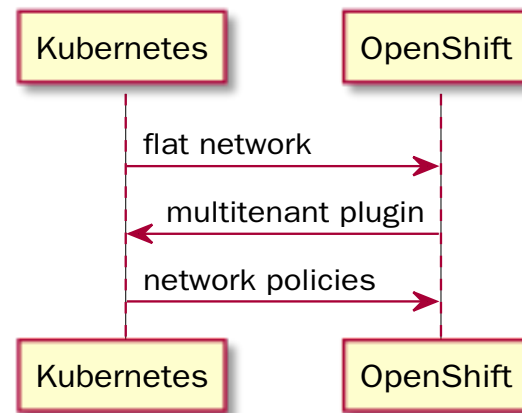

Kubernetes

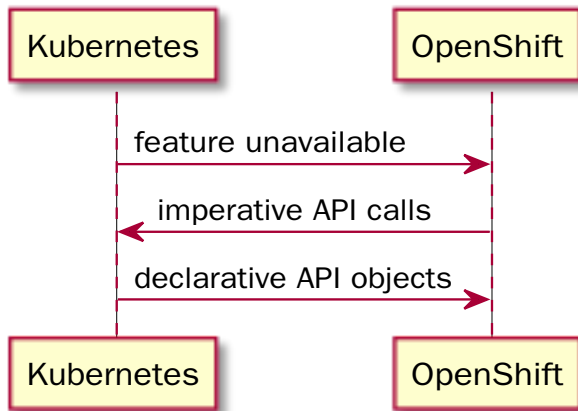

PIZZA EFFECTS: IDENTITY

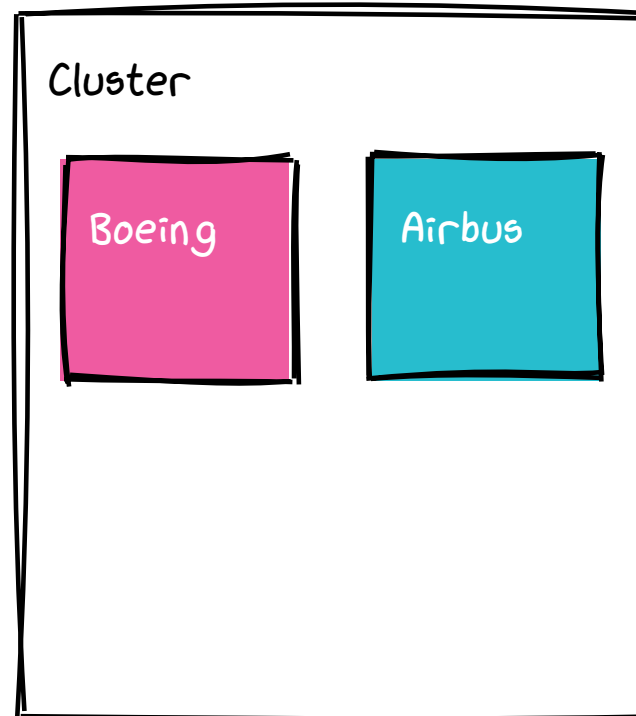

PIZZA EFFECTS: NETWORKING

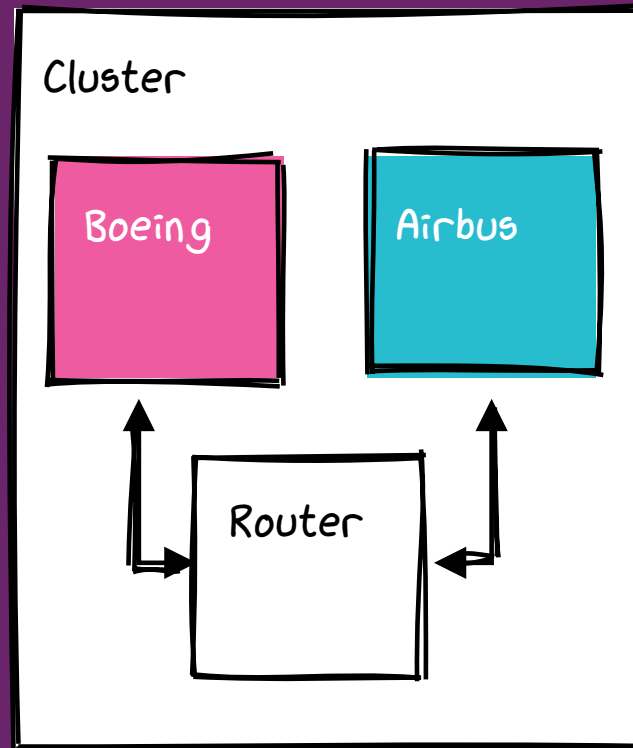

PIZZA EFFECTS: GENERIC

NAMESPACES

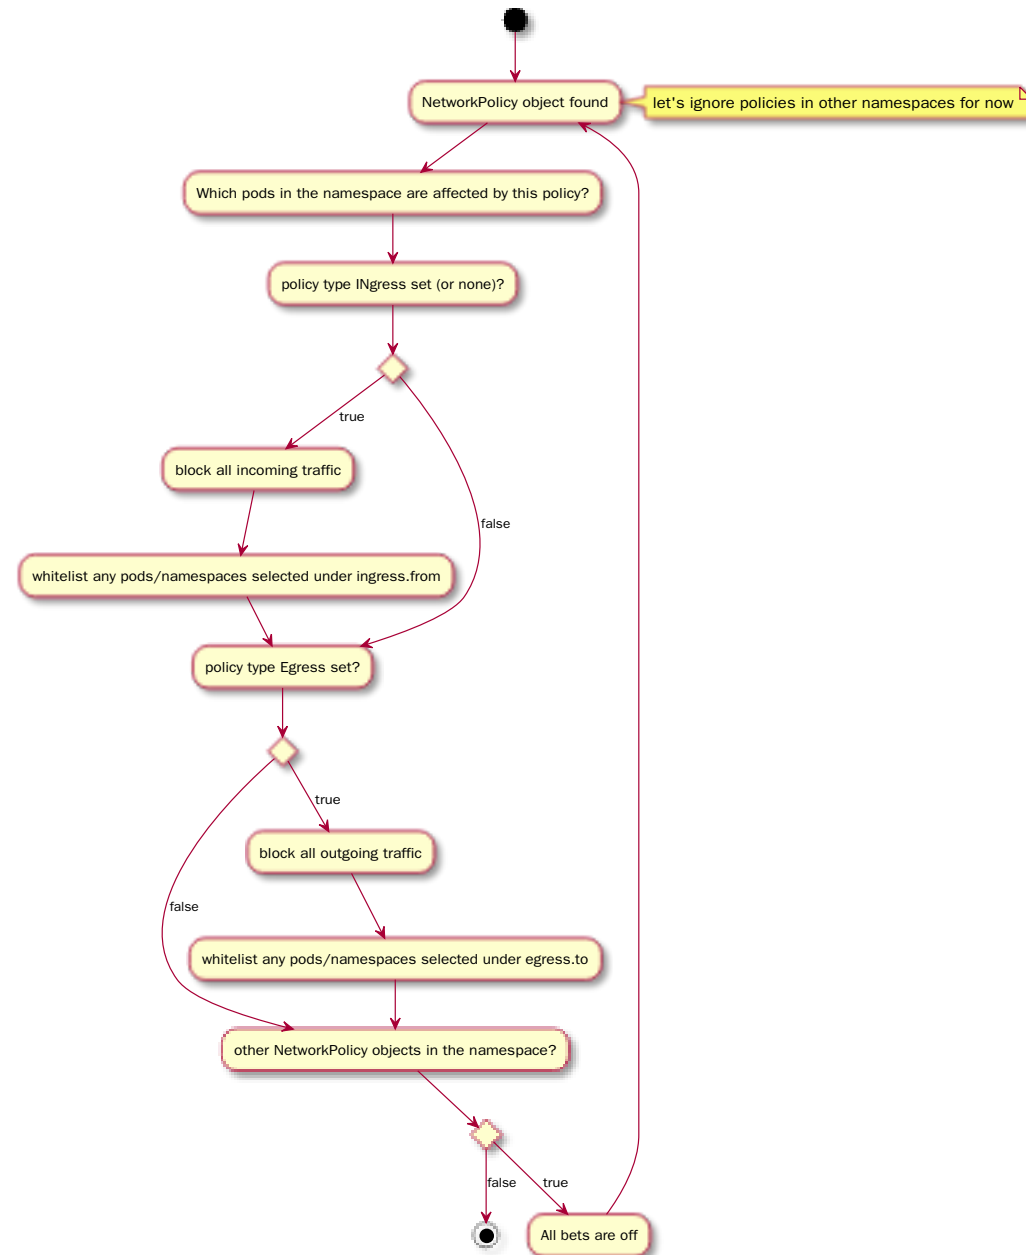

ENABLE ROUTER ACCESS

```
$ oc adm pod-network join-projects --to Router Boeing Airbus
```

Projects are a very, very thin wrapper around Kubernetes namespaces.

WHAT THE PARSER SAW

BEWARE ROUGH EDGES

I'm a little bit sad how complex Kubernetes is right now.
In some sense Kubernetes is not for end users, it's for
people who set up clusters and clusters are for end users.
